# 4 About key and token

In this section the concept of key and token is explained. You need to provide the key and token information in order to register your device online. The definition is taken from https://cloud.google.com/endpoints/docs/openapi/when-why-api-key

 ${\bf key}\,$  API keys identify the calling project — the application or site — making the call to an API

**token** Authentication tokens identify a user — the person — that is using the app or site.

## 5 Commissioning
